

Risk Management Workshop for the Lumber Industry

When it comes to risk exposures in the workplace, the lumber industry has more than its fair share of day-to-day challenges. If not managed effectively, exposures including new OSHA rules, workplace violence, hazardous energy control and changes in workers compensation laws can put your company assets at risk. This workshop is specifically designed for business owners, operation managers, supervisors, safety committee members and anyone who is responsible for safety in the lumber industry. We will share information on how to directly impact the profitability of your business.

Lake States Lumber Association Education, Inc.
337 Superior Avenue
Crystal Falls, MI 49920
